## Skills

## Summary

A dedicated full-stack developer with more than 3 years of experience in React and Angular projects. Having a passion for problem-solving, I made the client's elaborate design into codes with a proven ability to leverage full-stack knowledge and experience to build interactive and user-centered website designs to scale. A strong work ethic, self-management skills, and communication skills, enabling me to solve complex problems proactively.

## Work experience

Front-end developer: eEpic Technologies - Canada

Aug 2023 – Present

Tech stack: Next.js, TypeScript, Tailwind, GraphQL

- Development a platform to streamline the coordination between vendors and users for efficient event planning.
- Contributed to a dynamic team environment, consistently meeting deadlines in two-week Agile sprint cycles.
- Integrated server API using GraphQL to facilitate seamless back-end communication and minimize delays.
- Gained comprehensive understanding of Next.js lifecycle, effectively troubleshooting and resolving team challenges.

Front-end developer & data scraping: Social networking service App - Japan

Sep 2020 - Present

Tech stack: Angular, TypeScript, Ionic, Python, Selenium, Pandas

- Successfully designed and implemented home feed, comment, and other pages from scratch using Angular, TypeScript, and Ionic.
- Utilized object-oriented programming principles to create reusable components for improved efficiency.
- Overcame challenges in understanding Angular services with the guidance of a senior developer, now using them confidently in development.
- Assumed full responsibility for app design in the absence of a designer, resulting in a cohesive and visually appealing final product.
- Leveraged data scraping techniques to gather relevant data, which was then utilized in the Angular app to enhance its functionality and provide meaningful insights.

## Projects [\(More on my portfolio\)](#)

### [Appointly](#)

Tech stack: React(Vite), JavaScript, Tailwind, Daisy UI, Express.js, redux, redux-persist, MongoDB, mongoose

A MERN app that manages all your meeting schedules. Using Redux Persist manages user session, even browser is refreshed, user still logged in. Handling schedule logic was quite tough, but my strong knowledge of JavaScript and logical thinking work greatly.

### [Task manager](#)

Tech stack: React(Vite), JavaScript, Tailwind, Express.js, react-beautiful-dnd, MongoDB, mongoose

A MERN app was developed to manage tasks using drag-and-drop, with the React-beautiful-dnd library being used for this purpose.

### [Job hunt organizer](#)

Tech stack: EJS, JavaScript, Tailwind, Express.js, Postgres

I built a full-stack app for organizing job applications, presenting the data in a table format. Despite the challenge of using Postgres, the development process provided me with valuable insights.

## Education

Web and Mobile App Development   Cornerstone International Community College of Canada   (Apr 2022 - Apr 2024)
